

Yamoto Website

Project Scope

Prepared by	Akshat Gupta
Date	29 September 2026
Version	1.0

1. Overview

Yamoto is a Hyderabad-based automotive service shop offering wheel alignment, wheel balancing, nitrogen filling, tyre rotation and tyre purchase. The shop serves one specific area of Hyderabad.

2. Objective

Build a landing page that captures local search traffic: people in Hyderabad searching Google for tyre and wheel-related services near them. This is a geography-specific play, so the page is built with strong local SEO in mind: location-based keywords, Google Business Profile alignment and structured data for local business, so it ranks for relevant local searches.

3. Scope

A single landing page. No additional pages.

4. Page Sections

Tentative, subject to change once content is finalised with the client.

- Hero: what Yamoto does, with primary CTA (call / WhatsApp / visit)
- Services: wheel alignment, wheel balancing, nitrogen filling, tyre rotation, tyre purchase
- Why choose us / differentiators
- Brands we use
- Gallery: shop photos, equipment, work in progress
- Location: address, map embed, directions and landmarks
- Request for quotation popup
- Hours of operation and contact details
- Customer reviews / testimonials, if available
- Offers and promotions, if any

5. SEO

- Location-based keyword targeting for Hyderabad and the shop's service area
- Google Business Profile alignment, with consistent name, address and phone number
- LocalBusiness structured data in JSON-LD, including address, geo coordinates, opening hours and service area

- Title tags, meta descriptions, semantic heading structure and image alt text
- sitemap.xml, robots.txt and canonical tag
- Open Graph and Twitter card images
- Mobile-first build, optimised for Core Web Vitals
- Google Analytics 4 and Google Search Console set up at launch

6. Build

Item	Detail
Framework	Next.js, statically generated
Styling	Tailwind CSS
Responsive	Mobile, tablet and desktop
Media	Optimised images and fonts
Forms	Request for quotation popup, with lead delivery to email and WhatsApp

7. Deployment

- Deployed on Vercel
- Domain www.yamoto.com connected by updating the A and CNAME records at the registrar
- SSL certificate enabled
- Sitemap submitted to Google Search Console
